PROFESSIONAL SUMMARY

Software engineer with 4+ years building reliable, scalable infrastructure and production systems. Strong experience with cloud architecture, containerization, CI/CD pipelines, observability systems, and backend development. Co-founded startup, leading all technical decisions from architecture to deployment. Achieved 99.99% uptime for distributed systems through robust architecture, automated monitoring, and proactive incident management. Skilled in DevOps practices, security automation, and building developer tooling. Currently completing MSc in Advanced Computer Science at Leicester (graduating July 2026).

TECHNICAL SKILLS

Cloud & Infrastructure: AWS (EC2, S3, Lambda, IAM), Docker, Containerization, Kubernetes (Familiar), Cloud Architecture

DevOps & CI/CD: Jenkins, Git/GitHub, Infrastructure Automation, Deployment Pipelines, Configuration Management

Monitoring & Observability: Grafana, Prometheus (Familiar), Logging, Metrics, Alerting, System Performance Tuning

Backend Engineering: Python, Node.js, REST APIs, Microservices, FastAPI, Flask, System Design

Databases & Security: PostgreSQL, MongoDB, MySQL, RBAC, OWASP Top 10, Security Automation, Linux Systems

PROFESSIONAL EXPERIENCE

TechMachinery Labs & Visiminds Technologies

Remote, India

Platform Engineering Consultant (Part-Time, University Breaks)

Oct 2023 – Present

- Provide platform engineering consulting during university breaks, building infrastructure automation and deployment pipelines while pursuing MSc studies.
- Design and deploy security automation platform (IVY) infrastructure, managing Docker containerization, API services, and multi-tool integration with scalable architecture.
- Implement monitoring and observability using Grafana dashboards for system metrics, service health, and automated alerting, ensuring high availability.
- Build automated deployment pipelines and infrastructure management systems, optimizing CI/CD workflows and reducing manual operational overhead.

TechMachinery Labs

Bengaluru, India

Software Development Engineer

Aug 2021 – Sep 2023

- Architected and maintained cloud infrastructure achieving 99.99% uptime for distributed systems, implementing robust monitoring, automated failover, and disaster recovery mechanisms.
- Deployed applications using Docker containers across distributed cloud environments, managing container lifecycle, networking, and orchestration for production workloads.
- Built automated data synchronization and replication systems for geographically distributed deployments, ensuring consistency and resilience across multiple regions.
- Implemented infrastructure monitoring using Grafana, creating comprehensive dashboards tracking API performance, database metrics, system resources, and application health with automated alerting.
- Collaborated with development teams to architect scalable solutions, making infrastructure decisions for AWS services, database design (PostgreSQL, MongoDB), and deployment strategies.

Drogher Technologies Pvt Ltd

Bengaluru, India

Co-Founder & Engineering Lead

Nov 2020 – Mar 2023

- Owned all infrastructure and deployment decisions for quick-commerce platform, building CI/CD pipelines with Jenkins, managing cloud resources, and ensuring system reliability.
- Architected scalable microservices infrastructure using Node.js, PostgreSQL, and Docker, implementing automated deployments and infrastructure provisioning.
- Set up monitoring, logging, and alerting systems for production services, establishing SLOs and implementing incident response procedures for high-availability platform.

EDUCATION

University of Leicester

MSc Advanced Computer Science – Dissertation: AI-Powered Fashion System

Leicester, UK

Jan 2025 – Jul 2026

Ramaiah Institute of Technology

B.E. Information Science & Engineering – CGPA: 8.49/10

Bengaluru, India

Aug 2018 – Jul 2022

KEY PROJECTS

IVY - Security Automation Platform Infrastructure | *Docker, Python, AWS, Grafana*

- Designed infrastructure for security automation platform, deploying containerized services with Docker, managing multi-tool integrations, and ensuring scalability.
- Implemented comprehensive monitoring with Grafana dashboards tracking scanning performance, API latency, resource utilization, and system health with automated alerting.

High-Availability Distributed System | *AWS, Docker, PostgreSQL, Monitoring*

- Architected cloud infrastructure achieving 99.99% uptime through automated monitoring, load balancing, failover mechanisms, and proactive incident management.
- Deployed microservices across multiple availability zones, implementing automated backups, disaster recovery, and zero-downtime deployment strategies.

CI/CD Pipeline Automation | *Jenkins, Docker, Git, AWS*

- Built end-to-end CI/CD pipelines with Jenkins for multiple projects, automating builds, tests, containerization, and deployments to AWS infrastructure.

ACHIEVEMENTS & RECOGNITION

Winner, hackCOVID by HackerEarth (2020) – First place among 4,500+ competing teams

Winner, OneHack 2020 – Team India international representation

Student Advisory Board Member – Ramaiah Institute of Technology
